

ELECTRIC CENTER RIDE TOW TRACTOR ETR 50 / 75

10,000 / 15,000 LBS. Towing Capacity

Series 1103

- → Compact footprint with responsive steering allows precise maneuvering in tight spaces
- → Comfort suspension system offers a smooth ride and large operating compartment reduces operator fatigue
- → AC componentry delivers responsive acceleration braking and travel speeds with powerful 4.0 kw motor
- → Suitable for many types of couplings and connection mounts
- ightarrow Full access to all of the trucks main components by removal of a one piece durable cover

STANDARD & OPTIONAL EQUIPMENT

STANDARD

- AC drive motor
- Manual steering with tilt column
- Regenerative braking
- Operator presence switch
- Rubber, anti-fatigue mat
- Horn / Key switch
- Knee pad
- Lean-on seat
- On-board diagnostics
- Sealed harness connectors
- Multifunction dash display
- UL "E"

OPTIONAL

- Direct electric steering
- Drive tire and load wheel options
- Battery compartment rollers
- Storage tray
- Shrink wrap holder
- Easy pick system
- Cold storage / corrosion protection
- Travel / back-up alarm
- Travel / back-up flashing lights
- Front work light
- BlueSpot™
- UL "EE" rating
- Keyless On / Off
- Fold-down step for added reach
- Towing: Automatic, pintle, eye, pin
- Heavy-duty stability castors

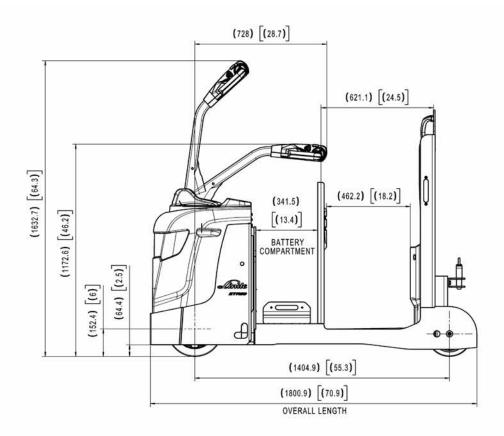

ETR 50 / 75 TECHNICAL DATA

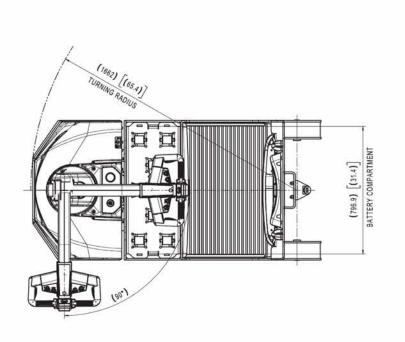

October 2020

Linde Series 1103 Five Features

- Motor Compartment Cover: The Series 1103 features a one-piece, lift off motor compartment cover. In addition to its resistance to rust and corrosion, these thermosetting resin covers offer superior impact strength, durability, and lifelong proper fit. The same rugged material is used today by most large construction machinery OEM's.
- Operator controls: The operator control handle features a heavy-duty cast design / steel poly construction. Soft-touch accelerator twist grips govern travel direction and speed, and also features automatic return to neutral.
- Drive Motor: The Series 1103 features a 24-volt, high power, AC drive motor. This high performance motor allows
 for maximum productivity and excellent reliability. Extended maintenance intervals for motors and complete drive
 systems are a direct result of this new AC technology.
- Frame: Truck frames feature fixed platform height and all seam-welded unitized construction. Plate steel contoured to shape for rigid strength provides maximum durability and protection for all vital components. The battery's own compartment is an integral part of the chassis, further adding strength to the frame.
- Travel Control: The AC motor controller provides exceptional flexibility by providing user tailored parameters to meet a wide variety of application requirements. The controller provides efficient use of battery voltage and has an extremely wide torque and speed range. In addition, full regeneration capability, smooth low speed control, and zero speed ramp hold applications are realized. Environmental protection is enhanced by the robust construction of the controller and the use of sealed wiring harness connectors to prevent moisture and contaminants from interrupting truck operation in all environments.
